

Health, Safety, Environment and Quality Policy

OUR VISION AND PURPOSE

The Mastermyne vision is to be a world class provider of contracting services. Our purpose is to create value through the long term delivery of specialised contract services to operations in the resources, ports and heavy industrial sectors.

OUR COMMITMENT

We foster a pro-active HSEQ culture underpinned by strong values and where all individuals demonstrate a personal passion and commitment to:

- Safe work behaviours and practices - Safety Always.
- Environmental protection and sustainable use of resources.
- Systematic risk-based planning, resourcing and execution of work.
- Customer excellence, continuous improvement and innovation.
- Leading by example and with integrity.

OUR ACTIONS:

We maintain a HSEQ Management System that complies with regulatory requirements and International and Australian Standards, including AS/NZS 4801, ISO 14001 & ISO 9001.

We develop business plans and set and report on measurable objectives and targets that promote sustainable development, best practice and continuous improvement.

We collaborate with internal and external stakeholders to further develop the relationships, knowledge and skills necessary to deliver a safe, sustainable, quality service.

We strive to provide products and services that meet or exceed the requirements prescribed in relevant agreements, contracts, codes and statutory obligations.

We monitor and review our system to maintain relevance and regularly report on both lead and lag indicators to gauge system effectiveness.

We work with our clients to help them achieve their objectives and obligations and deliver added value by identifying and responding to their evolving needs and expectations.

Responsibility for the application of this policy rests with all Mastermyne Group personnel because it is only when we work as a team that we achieve our vision for the best possible HSEQ outcomes.

Tony Caruso - Managing Director
